CSU11013 Programming Project 2025 Report

Group 2

Individual Contributions Summary

Name	Student ID	Contribution Summary
Yu Xue Chen	23373711	The Filter of the flight method for arrival and origin city search. The arrival and origin city screen UI. The displaying of the flights in plane tickets format.
Ho Hon Ma	24380273	CSV Parsing, Queries, Bar Chart, Flight Info Display, Data Visualization, Reading Data, Mousepress, MouseScroll, Merging Flight Class, Aesthetics, Comments for all code
Saanvi Boggaram	24380506	Data Visualization, Charts
Yan Wa Lee	24382959	Creating main screen (MainScreen, Screen and Widget class), scrolling function, merging and debugging, visuals
Yao Han	23376670	Flight data sorting (date/city), dynamic labels, state tracking, and UX-focused reset logic.
Dana Barri	24381806	Chatted with Professor individually

System Design

1. Data Input and Parsing

- Raw flight data is read line-by-line from a CSV or file input.

- Each line is parsed into a Flight object and stored in an ArrayList<Flight>.

2. Screens and Navigation

- UI is managed through multiple custom Screen objects:

    o MainScreen: Entry point for user interaction.

    o Different functional buttons

- Buttons and widgets use the Widget class, handling interaction and appearance.

3. Data Filtering and Display

- Flights are filtered by user selection (e.g., by city, date, or cancellation status).

- Matching flights are displayed in scrollable lists or bar charts.

4. Visualization Logic

- Bar charts represent totals.

- Mouse clicks on bars/buttons trigger filtering and screen transitions.

5. User Interaction

- Mouse events (mousePressed & mouseWheel) manage navigation, scrolling, and selection.

- Button change colour feature when mouse is hovering over them.

- Sorting functions allow date based order organization.

Core Features

1. **Flights by Date Range**:
   - Flights are sorted by Date in default
   - When the user selects the Monthly flights Button on Main Screen, a bar chart will be shown.
   - The Bar chart will illustrate the number of flights each day of the month.
   - When a bar on the bar chart is clicked, the corresponding flights info will be displayed.
   - Scrolling is implemented.

2. **Flights by Origin Airport**:

   - User can type in an origin city's name to get all the flight details displayed in a flight ticket visualisation
   - Colour of the tickets is
     - o Blue, if it is on time
     - o Red, if it is cancelled
     - o Orange, if it is delayed

   - User can sort flights with Ascend/Descends Date or Ascends/Descends alphabetic order of City Name.
   - Search Box allows User I/O Interactions
   - The scrolling function is implemented

3. **Flights by Arrive Airport:**
   - Similar features as Origin City

4. **Flights by Cancelled/Delayed/Late Flight:**

   - When user selected cancelled flight Button on Main Screen, a bar chart will be shown
   - Bar Chart illustrates the Number of Cancelled/Delayed/Late flights
   - When a bar is clicked, corresponding flights Info will be displayed inside the container
   - Flights are sorted by Date in default
   - Scrolling function is implemented

User Interface & Interaction

Home Screen:

- Users interact with clickable buttons that brings user to different screens
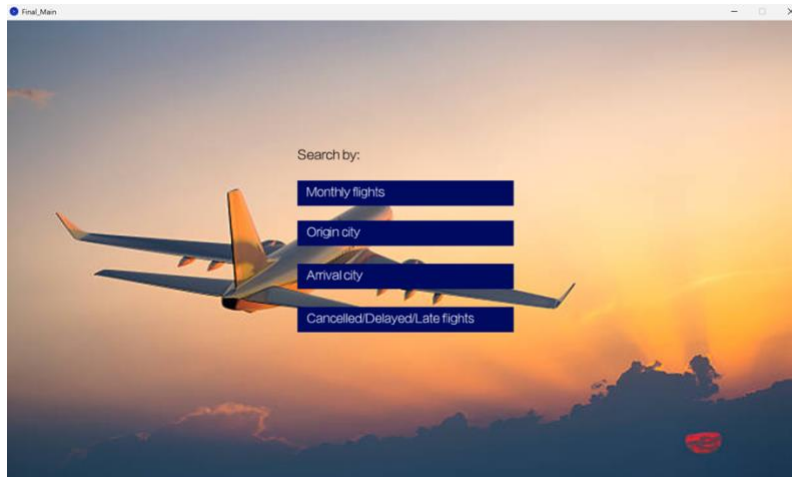

Monthly Flights Screen:

- Bar Chart is displayed when "Monthly Flights" is pressed showing the number of flights on different day
- Bar will change to yellow when clicked

- When specific bar is clicked, show flights info of that day with scrolling implemented
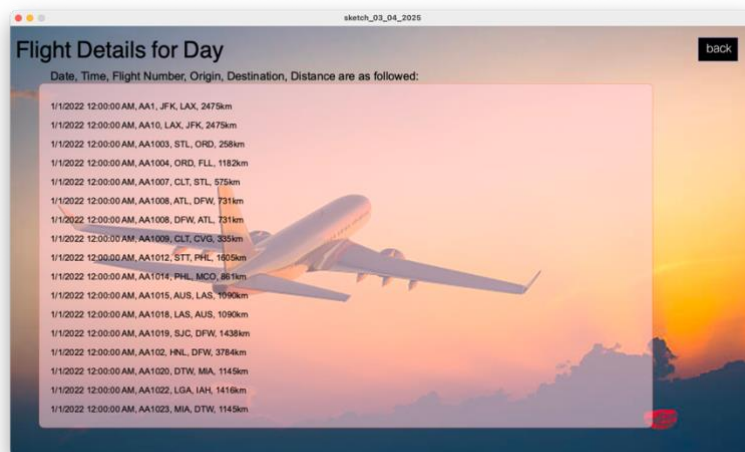

Origin City Screen:

- When Origin City is pressed, buttons and search box will be displayed

city-based

Date descending order

Destination char order

Arrival City Screen :

- Cancelled or Delayed flights are displayed with different colours

- Error will be shown when input is invalid
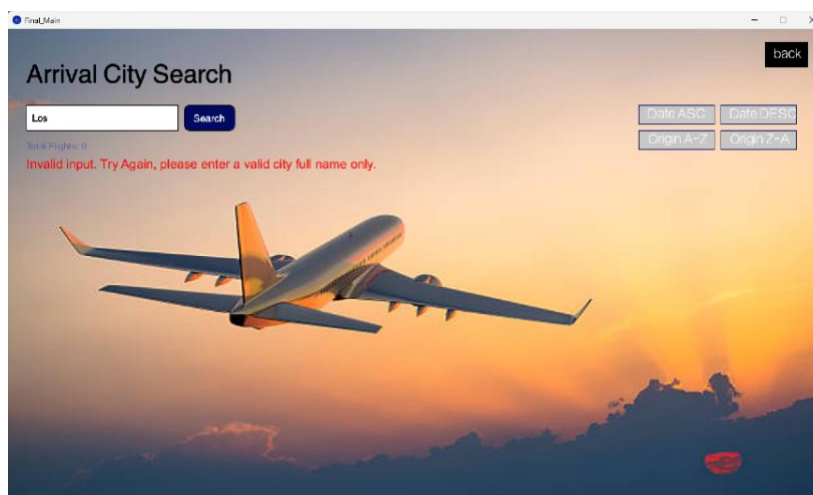

- Original char order (if arrival)

Cancelled / Delayed / Late Flights Screen:

- When the cancelled/delayed/late button is pressed, show bar chart for Delayed and Cancelled flights
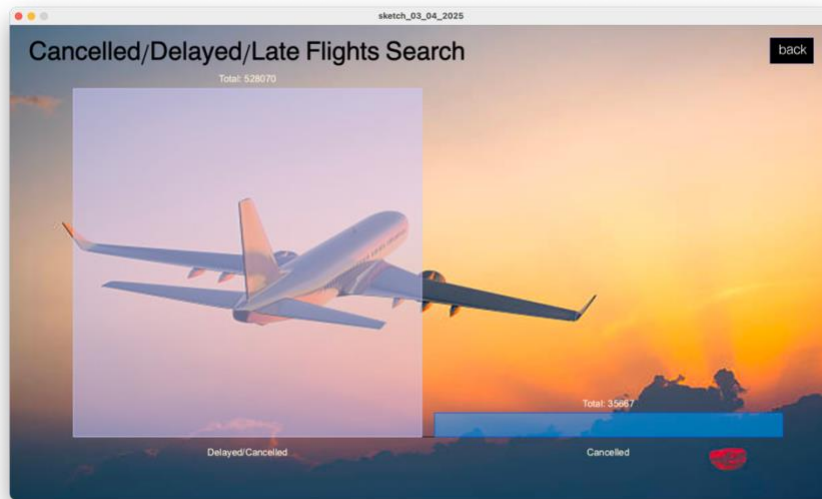

- When a bar is clicked, details of it will be displayed with scrolling implemented

Week	Tasks	What we have done	Individual Work
8	**Demonstrate reading of data from file and give outline of main program, including major classes, sketch of screens.**	Meetup: - Discussed about what features we will include in our project. - Set up group chat - Practised GitHub with alien game - Set up GitHub Repository - Split Tasks	**Yu Xue Chen:** - Main file and initial code to print(console) **Ho Hon Ma:** - Code to read CSV - DataPoint class created - Print flights Info(text) **Saanvi Boggaram:** - Planning of the Screen **Yan Wa Lee:** - Planning of the Screen **Yao Han:** - Display new screen with two widgets - Merging DataPoint class with screen
9	**Graph and textual output of data**	Meetup: - Plan and Design - Split tasks in details	**Yu Xue Chen:** - Merging previous weeks' code - Starting Origin&Arrival Seraching **Ho Hon Ma:** - Bar chart visualization for sorted flights info - Display specific flights info on screen **Saanvi Boggaram:** - Bar chart for monthly flights. **Yan Wa Lee:** - Main Screen: Widget, Screen class, mouseWheel and mousePressed method **Yao Han:** - 2 new Date Sorting Buttons

			- Starting Ascending/Descending buttons
10	**Apply user queries to data set and present results on screen**	Online Meeting: - Split tasks - Discussed issues raised - Merged code from previous weeks	**Yu Xue Chen**: - Finishing origin and arrival screen UI - Printing filtered flight on the screen in lines. **Ho Hon Ma:** - Merging display info and bar chart to the other classes(widget, screen, main, etc) **Saanvi Boggaram:** - Merging the bar chart with Monthly date range with other classes - **Yan Wa Lee:** - Debugging after merging and improving visuals (alignments, text colour) **Yao Han:** - Finishing 2 new buttons for sorting by Ascending/Descending alphabetic order
11	**Select different options and change screens**	- Merged all separated components together - Aesthetic Design and Decisions(colours, shapes)	**Yu Xue Chen:** - Display flights info in ticket format **Ho Hon Ma:** - Merging and Polishing all the code - Optimising all code especially readData and FilterFlights - Helping my teammates to debug

			- Improving the user interface design of the program. - Add comments for all code **Yao Han:** - Polishing and Finishing the 4 sorting buttons **Yan Wa Lee:** - Adding background image - Improving visuals (stroke, text and widget positions) **Saanvi Boggaram:** - Help merging the bar chart with all the codes - Polishing the codes.
12	**Demonstration**	Group Demonstration	Group Demonstration
